

The BLAIRMORE GRAPHIC

VOL. I, NO. 1.

THE BLAIRMORE GRAPHIC, FRIDAY, AUGUST 2, 1946.

\$2.00 PER ANNUM

Announcement

A new chapter in the history of The Blaimore Enterprise begins with this issue.

For upwards of thirty-six years this paper has carried at its mast-head the familiar name of W. J. Bartlett as publisher. The voice and pen of "Bart" have now been stilled, but it is fitting that the mantle, authority and responsibility of publisher, editor and proprietor should have fallen, as they now have, on one who has been intimately identified with the business and a faithful employee for more than twenty-two years. And so, with this issue the name of J. R. McLeod, familiarly known as "Roddy," appears as that mast-head, he having acquired the sole ownership of the Blaimore Enterprise, building and job-printing plant operated therewith.

MARY S. BARTLETT.

"Serve the Church that the Church May Serve You."

CENTRAL UNITED CHURCH
BLAIRMORE

Rev. James McKelvey, Minister

Sunday next:
11.00 a.m., Senior school.
2.00 p.m., Junior school.
7.30 p.m., Public Worship.

ST. LUKE'S CHURCH, BLAIRMORE

Rev. W. Grainger, Rector

Sunday next:
Evening service 7.30 p.m.

SALVATION ARMY, COLEMAN.
Captain and Mrs. T. Smith,
Officers in charge.

Sunday services:

11 a.m., Holiness meeting.
2.30 p.m., Directory class.
3 p.m., Sunday school.
7.30 p.m., Salvation meeting.
Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.
Thursday: 8 p.m., Prate meeting.
Funerals, dedications and marriages on application to the local officers.

HILLCREST UNITED CHURCH.
Services every Sunday at 3 p.m.

BELLEVUE UNITED CHURCH.
Services at 7.30 p.m. every Sunday.

COWLEY UNITED CHURCH.
Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

BELLEVUE BAPTIST CHURCH
Pastor: Rev. Fred Bennett

Sunday school 10 a.m.
Morning worship 11 a.m.
Evening service 7.30 p.m.
Midweek meeting:
Wednesday 7.30 p.m.
A cordial welcome awaits you.

\$2,000,000 SET AS S. A.

APPEAL OBJECTIVE

Every indication points to a record breaking parade to open Coleman's first annual Crow View Rodeo. Business houses, coal companies, organizations, and citizens have promised to have a float, decorated car or bicycle in the parade. In addition there will be the contestants, Indians, youngsters of European nationality in their picturesque costumes, all combining to make it a bang up parade. Leading the way will be the flags of all Allied Nations carried by girls attired in their native costumes. They will be followed by the Michel-Natal 50-piece brass band. Along the line will be the mayor and his councillors, Old Timers of

HILLCREST HAPPENINGS

Miss Betty Craig is a holiday starter with friends in Calgary.

Mr. and Mrs. E. Hartford have as their guest their daughter, Miss Doreen Schaff, of Medicine Hat.

Mr. and Mrs. Alex. Grant motored to Lethbridge on Saturday to meet their son Donald, who had been a guest of Mr. and Mrs. T. Selby, of Milk River.

Mr. and Mrs. Hagau and family have motored to Cardston, where they will reside.

Mr. and Mrs. Porchus have bought the residence of Adam Martinek.

Wing Chan, who has been studying at the University of Toronto, is home for the summer. Lily, who was working in Kimberley and Jos, from Vancouver, are also home.

Archie and Margaret Monti are spending the summer months with their grandparents, Mr. and Mrs. T. Caletti, of Burnia.

Medicine Hat visitors last week were Mr. and Mrs. A. Bain, who were guests of their daughter and son-in-law.

Mr. and Mrs. J. Atkinson have returned from a vacation to the coast.

Mr. and Mrs. Angus Grant attended the reunion of the 12th Battery, held in Lethbridge the weekend of the 20th.

Mr. and Mrs. J. Halfon are spending a week's holiday at Cameron lake.

Mrs. Edith McDade arrived from England last week, she was met in Calgary by her husband, and Mr. and Mrs. J. McDade.

The Hillcrest Ball Park was the centre of attraction over the weekend, when a series of three exciting exhibition games took place between the C. N. P. All-Stars and Sceptre, Saskatchewan champs. Interest was high as the visiting team had the reputation of being only five games out of sixty-nine played. The home boys were out with all they had Saturday night to defeat the visitors 9-2. The Sunday afternoon game ended 8-5 for Sceptre, so excitement was keen for the third game which was played Sunday evening. The All-Stars were well ahead for the first four innings but Sceptre worked hard and tied the score during the fifth inning and from then on they were well away, winning the final game 14-0. A good crowd was in attendance at all three games.

DEMOCRACY'S AGGRESSIVE WAR

There is plenty of room in the world for nations with different ideas. But is there room for those with different ideologies?

An idea is something you may have in mind and do nothing much about. Or you follow it out in your own attire and leave men free to follow out theirs.

An ideology, however, is an idea with an emotional charge. It burns within you with such passion that you want to give it to all the rest of the world, and you form far-reaching plans to do so.

By their very nature, therefore, opposing ideologies must grapple with each other in a global "battle royal" until, by greater power of persuasion or achievement, one wins the other, or subjugates by a greater force of arms.

If democracy is just an idea it will fall before the passion and the plan of a robust ideology. Even a bad plan is stronger than none. But if democracy is really born within us, and we have an adequate plan, democracy itself becomes an ideology. And if it is sentimental nonsense to suppose that it can passively sit at side by side with any other. We must fight to make our Christian democratic ideology or lose it.

Remember, however, there are two ways to fight. We may fight with arms, though, of its nature, democracy can only do this in defence against aggression. Or we can fight to make democracy work so well in our own country that all the rest of the world

NATALIE MINUNZIE

WINS \$15,000 CONSERVATORY SCHOLARSHIP

Friends are congratulating Miss Natalie Minunzie, 17-year-old daughter of Mr. and Mrs. Charles Minunzie, of Blaimore, on her success in winning the Dominion-wide \$15,000 scholarship in observance of the diamond jubilee of the Toronto Conservatory of Music. The audition was held at Vancouver this spring.

Miss Minunzie is a native of Blaimore, having been born here and received her education in the local schools, as well as her early musical education. She is well remembered as a consistent winner at Crow's Nest, Pass musical festivals, many times in classes above her age. A great deal of her success in these early days can be attributed to the interest of our local teacher of music in the schools, Mr. W. G. Moffatt, and experience gained at these festivals.

At the age of 12, Miss Minunzie went to Vancouver as a pupil of Mr. John Goss. In 1945 she won first honors in the Vancouver musical festival open vocal class, and also won the shield donated by the Vancouver Women's Club. The same year she made her debut with the Vancouver Symphony Orchestra.

She has broadcast over radio station CBR, Vancouver, has held recitals in Vancouver and Victoria, and appeared in the Theatre Under the Stars in Stanley Park.

It is only last August that Miss Minunzie delighted a Pass audience in recital in Columbus Hall here, accompanied by her teacher John Goss, with Pearl Kerr, of Vancouver, as accompanist, and Donald Graham, of Coleman, assisting.

Miss Minunzie leaves for Toronto next month to start the two-year special course covered by this scholarship.

It is singular that two Alberta girls were honored in connection with the Conservatory jubilee scholarships. Miss Donna Fraser, of Edmonton, was successful in piano.

will want to adopt it. That is the one way in which democracy can wage "aggressive war." The only alternative of those who otherwise would just deplore the passing of democracy or who "in self defence" would plunge the world into atomic war.

RATION BOOK DISTRIBUTION

Local ration boards throughout Alberta have been preparing for the distribution of Ration Book No. 6, during the week of Sept. 9 to 16. Organizational meetings have been held by all local ration boards according to reports reaching the ration administration of the Wartime Prices and Trade Board.

Local ration boards are enlisting the aid of volunteer workers for the distribution campaign, as the same system which was used in former years campaigns will be used for the 1946 distribution.

The great burden of the task of distributing approximately 12,000,000 ration books will fall on Canada's local ration boards and their volunteer supporters. The volunteer service of many citizens have in the past played an important part in the successful operation of rationing throughout the war years.

Local ration boards will decide during August on the dates for the distribution of the books in their communities. The complete week of Sept. 9 to 16 has been set aside as ration book distribution week, but each local ration board will decide on the days during this week when the books are to be distributed in their territories.

Citizens will be advised through the medium of the press of the distribution dates in their own locality. Citizens should arrange to get their new books during their local distribution in order to co-operate with the volunteer workers in their community.

CLIMATE AND HEALTH

Changeable climates are actually the best for production of physical and mental energy, say health authorities.

A spokesman for the department of national health and welfare states: "Anyone who can face all kinds of weather with exhilaration is more likely to face up to the storms of modern living than the person who is shielded. Our bodies, as well as our minds, are made to be adaptable, and should be capable of a bracing struggle with the winds of weather as well as the buffeting of circumstances."

We are all the same underneath but some keep themselves further underneath than others.

COWLEY HAPPENINGS

Mr. and Mrs. Scottie Wells, of Bellevue, were recent guests of Mr. and Mrs. Robert Littleton.

Mrs. Carm Ellis and Mrs. Anderson, of Calgary, and Mrs. Wm. Cochran are on a week's motor trip to visit friends at Ellensburg, Washington.

Mrs. L. F. Burkhardt is on a holiday visit with friends at Nelson, BC.

Mrs. Arthur Freeman and her daughter Helen, of Macleod, returned home on Tuesday, following a week's visit with Mr. and Mrs. Harry Carney and family here.

Mrs. Leslie Day and her two small daughters, Carolyn and Margaret, are paying a visit at the parental home of Mr. and Mrs. J. R. Wood at Cranbrook.

Miss Alda Thibert, of Edmonton, arrived home on Wednesday to spend a couple of weeks here with her parents, Mr. and Mrs. Moose Thibert.

Mr. and Mrs. L. W. Colvin and family, of Port McNicoll, Ontario, have returned to Alberta to take a year enforced holiday owing to Mr. Colvin's state of health. At present the family is visiting relatives in this district.

Mrs. Albert Cleland entertained the Ladies Aid of the United church at their monthly meeting at her home on Thursday afternoon of this week.

The harvesting of grain was begun in this district this week with the weather and the combine mostly being used.

Mr. and Mrs. K. J. Martin and their two daughters, Wilma and Rita, of Moosehide, on returning from a month's holiday trip to Seattle, Vancouver and other BC points, stopped over here to pay a short visit to their sons, Kenneth and Linden Martin, and their families. Mr. and Mrs. K. J. Martin have purchased property at Kelowna, BC, to where they intend moving in the near future to take up permanent residence.

Word has been received by cable from New Zealand announcing the birth of a daughter, Patricia, to Mr. and Mrs. J. C. Murphy. Mrs. Murphy was formerly Alina Ritt. She served several years with the CWAC and when stationed at Vancouver met her future husband who was training in the Air Force, being one of the boys from that distant land.

Mrs. Elliot (nee Rose Fortier) accompanied by her two daughters, of Richmond, California, and Mrs. George Fortier, of Oakland, California, who travelled by motor car, arrived on Tuesday to pay a visit to her brother and sister-in-law, Mr. and Mrs. Wilfred Fortier here. Mrs. Elliot has two sons in the Merchant Marines, one is stationed in Australia and one in Japan.

"TAXED EVEN IN PULPIT—HANSELL"

Rev. E. G. Hansell (S. C. Macchod) sought to prove to the commons that the individual is taxed at every turn he makes; when his child buys a chocolate bar, when he himself uses electricity, if he has a car, when he dies—and even in church.

Speaking during study of budget resolutions, Mr. Hansell, a minister of the Church of Christ, was unfolding his argument when Veterans Minister Mackenzie interjected:

"Taxed in the pulpit?" Mr. Hansell: "If the minister of veterans affairs will come to my church..."

Mr. Mackenzie: "I shall be glad to." Mr. Hansell: "...I shall tell him that in spite of the fact he comes from the highlands he is going to put something on the collocation plate."

Mr. and Mrs. W. H. Crappell, accompanied by Mr. and Mrs. Albert Huppell, are motoring to Vancouver where they will be guests of Mr. and Mrs. Clifford Chappell. They leave on Sunday morning.

WORLD HAPPENINGS
BRIEFLY TOLD

Payment of Britain's new retirement pensions of 20s (3.40) a week will begin in the first week of October this year.

Sir Charles Arden Clark, resident commissioner of Basutoland, South Africa, has been appointed governor and commander-in-chief of Sarawak.

Household taps, trays, and spoons are being made at the famous Woolwich arsenal, where, less than a year ago, tanks and guns were top priority.

Plans are being made for a reunion in Britain in 1945 of the 280,000 members of the U.S. Eighth Air Force who served in the country during the war.

British commonwealth countries still hold a total of 39,181 German prisoners of war. War Secretary Lawson said in a written reply to a parliamentary question.

Cost of "conveyance of Their Majesties (King George VI and Queen Elizabeth) on the Royal visit to Canada" in 1939 was £27,262 (\$109,048), it was disclosed.

The work of transporting 100,000 men of the Polish 2nd corps to Britain should be completed by the end of the year, it was learned in authoritative quarters. The movement started in July.

The Agricultural Institute of Canada will award 20 scholarships of \$800 each for post-graduate training at Canadian universities of recognized standing. Dr. C. E. Green, institute secretary, announced.

Sixteen prize stud rams were flown 700 miles from Adelaide, Western Australia, to Sydney for the annual Pyrmont sheep sale. The light look four hours and the rams, valued at \$30,000, suffered no ill effects.

Immortal Music

Precious Manuscripts Of Composers Found In Germany

Precious music manuscripts of Bach, Beethoven, Mendelssohn, Mozart and Brahms, which belong to the Berlin State Library, have been found in various parts of Germany by the Allied occupation authorities, the British news service in Germany reported.

Most of the manuscripts, including those of Bach's Christmas Oratorio, Beethoven's Fourth Symphony and string quartets, and Brahms's Violin Concerto, were found at Schloss Benz, Franconia.

The manuscripts of Bach's St. Matthew Passion, Beethoven's Missa Solenne and Egmont Overture were discovered at Beuron Monastery. The first and second acts of Mozart's opera "Figaro" were found at Magdeburg and the third and fourth at Gruessau Monastery in Silesia.

Among the other manuscripts which are safe are those of Beethoven's seventh and ninth symphonies and Mendelssohn's music for "A Mid-Summer Night's Dream."

Work Was Grim

Dutch-Canadian Girls Saw War Service In East Indies

Back in Canada after war service with the Netherlands armed forces in the East Indies, nine Dutch-Canadian girls told newspapermen something of their experiences recently in an interview at the offices of the Dutch Information Service in Montreal.

Tall, blonde girls, for the most part, they all enlisted in the Dutch armed forces from Canada and served as nurses, stenographers, clerks and drivers in Australia, Borneo, Java, Indo-China and other parts of the extensive territory that has today taken the place of the once peaceful and prosperous Dutch Empire.

Four of the girls are Canadian citizens and five still retain their Dutch nationality although living in Canada. They arrived in New York from Australia and were going to their homes in various parts of the Dominion. Two of the girls, Suzanna and Christine Prins, live in Montreal.

Some of the girls worked in prison camps soon after the Japanese surrender and had grim stories of the "starved skeletons of men and women" whom they helped nurse back to health and sanity. All of them had seen "a reasonable amount of shot and shell" both in the last-minute fighting with the Japs and in the trouble between the Dutch and British and the extreme nationalists among the Indo-Chinese.

"It was pretty grim at times," said pretty, blonde Suzanna Prins, "but all of us should be glad to do it over again."

OLDEST LOCOMOTIVE

LONDON—"Jane," oldest British locomotive in service when it was retired at the end of 1945, was bought by the Great Western Railway to save it from being broken up. It was built in 1837 and used by the Wantage Tramway Company.

Mixing penicillin with ice cream makes possible its administration by mouth instead of through the usual hypodermic injection. 2683

AIRCRAFT RESCUES SURPLUS PEAS FOR CANNING—To save surplus peas in the Trenton district of Ontario, this four-motored American Airlines DC4, the "St. Joseph," was used to fly the legumes to Windsor, where the Essex county canneries were able to process them. Fodded peas are packed in big cans for shipment.

Weather Forecasts

Science Of Predicting Weather Has Made Rapid Advances

During the war the science of predicting the weather advanced tremendously. Today this newly-acquired technique is paying rich dividends.

In the United States alone it is estimated that benefits amounting to \$3,000,000,000 a year have resulted from scientific broadcasts, warnings and reports.

But the U.S. Weather Bureau—along with co-operating Army and Navy meteorologists—no longer monopolizes the weather-forecasting field. A great many private meteorologists have entered the business, so many that it has now been suggested that the time has come for weather men to establish for themselves unit standards of professional competence, as doctors and lawyers have done.

How a private meteorologist could expect to make a living might puzzle one on first thought. The answer lies in industry. A large New York bakery, for example, regulates its baking and deliveries on the basis of weather forecasts, because the public's buying habits change with the weather.

The moving picture industry has its own weather men to forecast light intensity and other weather factors that influence photography. Commercial airlines have their own meteorologists to make specialized weather forecasts for various flight routes. Candy-bar manufacturers, particularly those using chocolate, need to know how many shades of time what the humidity will be. And cotton mills are among the latest industries to recognize the value of weather forecasts for production. Weather influences the operation of looms.

In the United States the Weather Bureau has welcomed newcomers to its field. Qualified private meteorologists are even permitted to cut in on the bureau's teletype network. So far as is known, no private meteorologist has set up shop yet in Canada. Canadians are entitled to specialized weather reports from government stations if they want them, and in cities like Montreal certain industries take advantage of the teletype equipment. For meteorological station is costly and a large staff is needed. Canada's cities are relatively small and it is doubtful if the private meteorologist will make his appearance in this country for at least some time.—Ottawa Citizen.

Idea Caught On

Englishman First Introduced Iced Tea At St. Louis Exposition

The story of the origin of iced tea has run many a story-telling gambit but the truth of the matter is—it was started in North America back in 1903 at the time of the famous St. Louis Exposition. An English tea commissioner from Calcutta set up an elaborate exhibit at the fair to promote the sale of India and Ceylon black tea. He even built an expensive pavilion and tea bar in authentic Moslem style. But the commissioner had no way of knowing that Missouri was having its hottest summer on record. He saw his investment expiring with the heat as fairgoers clustered about soft drink stands trying to quench their thirst. His only alternative was to try an experiment—serving tea cold. When he sat the iced tea out on the tea bar a few curious bystanders sampled it. They liked it and as word got around, customers came in larger numbers and by the time the St. Louis Exposition was over, iced tea was well launched as a popular summer thirst quencher.

NEW HOUSE MATERIAL

A new material made from wood shavings and scrapings is being used by a Munich firm in the construction of small one-family houses, the British news service in Germany reported. The material, covered with thin coatings of cement, is made into plates two inches thick.

The lense of the eye continues to grow in size throughout life.

PASTEURIZATION CAMPAIGN

GIVEN NATIONWIDE IMPETUS

Members of the General Council of the Health League of Canada at a recent meeting in Toronto gave impetus to the League's milk pasteurization campaign by passing a resolution to establish for themselves unit standards of professional competence, as doctors and lawyers have done.

The League Council consists of representatives of 51 national organizations—medical, professional, commercial and voluntary. After hearing Dr. F. F. Tidball of the University of Toronto state that milk is the world's finest food but at the same time it could be a destructive agent if it was used in its raw or unpasteurized form, the meeting also passed a resolution that all national organizations pass similar resolutions and forward them to their provincial premiers through their provincial and local units.

Both Dr. Tidball and Dr. A. Berry, Director of Sanitary Engineering, Ontario Department of Health, emphasized that the only way to prevent milk-borne diseases, such as bovine tuberculosis, undulant fever, typhoid and paratyphoid, among others, was to pasteurize.

Dr. Tidball said research at the Toronto Hospital for Sick Children proved that pasteurization does not damage milk's nutritive value. For instance, it was found that the process made milk's protein content more digestible, the minerals were not harmed, vitamin A remained unchanged, while any change in thiamin content was not noticeable. As for vitamin C, it didn't matter what pasteurization did to it because milk, particularly if it was left standing for some time, did not contain an amount to be of value.

Dr. Berry said that since Ontario introduced compulsory pasteurization in 1938 the province's typhoid case and death rates now are one-quarter what they were before the law went into effect. Infant mortality also had taken a drop.

The meeting went on record as congratulating Vancouver, B.C., Humboldt, Sask., and Campbellton, N.B., on the recent passing of compulsory pasteurization by-laws in those municipalities.

Alaska Highway

Forecast Heavy Tourist Traffic For Next Year

WASHINGTON—"Increasing tourist travel" over the Alaska Highway in 1947 is forecast by the Department of the Interior.

A review of road construction in Alaska notes that there is already some traffic on the 1,800-mile, war-built highway which starts in Alberta and snakes through the northland of British Columbia and the Yukon into Alaska, but the road is not yet open to tourist travel in general "because of the lack of facilities such as filling stations, repair shops and dining and sleeping accommodation."

The Next War

A Vivid Picture Of What May Happen If It Ever Comes

Alone among the great powers, the United States concerns itself with forecasts and preparations for the "next war." Its press, to the astonishment of Europe, teems with articles seeking to assess the nature and scope of this war and how best to devise defences against it.

Since in a few years knowledge of the manufacture of the atomic bomb will have spread to many countries, professional military opinion in the United States sees future battles waged mainly with long-range missiles. Flights of rockets will come hurtling across the Polar regions, passing over Canada in baleful flocks to lay United States cities in ruins. Consequently, the experts demand a system of defence that will include the power of retaliation as the best deterrent to attack. For such purpose the construction of a chain of rocket-firing bases throughout the continent and presumably in Canada's Far North, is the first essential.

These bases must be constructed either in natural or artificial caverns, far enough underground to be out of the reach of the lethal rays of the atomic bomb. Thousands of men will live there like troglodytes supplied with food and piles of atomic rockets to be fired in thousands at the far-distant enemy territory. Buried even deeper will be a central defence headquarters controlling the whole operational system. Then, in addition, there will be radar warnings on the continent and presumably in Canada, may be lost in preparing a crippling counter-attack. This will take the form of an invasion of enemy territory by airborne armies; and after that presumably each side will atom bomb the other until the fate of the famous Kilkenny cats overtakes both.

Incidental to this nightmare picture of a world gone insane, the removal of all armament plants to mammoth caves, the accumulation beneath the earth of vast magazines of bombs and stores, and the dispersal of the populations of all great cities.

How civil government will function in this confusion of a press-borne atomic war, the imagination refuses to indicate. Probably there will be no civil government—only a military dictatorship. And no doubt before the war ends there will be no population either.—Ottawa Citizen.

A Boon To Television

New Vacuum Tube Carries 10,000 Conversations At One Time

A basically new type vacuum tube that provides an electronic super-highway for communications has been announced by the Bell Telephone Laboratories, New York.

The device is important in facilitating cross-country television, and will be used in systems of long-distance short wave telephone. More than 10,000 conversations, one hundred million words of telegraph a minute, or several dozen television shows can be handled at one time—should traffic ever become that great.

TO BUILD A TELESCOPE

TORONTO—A barrel, a piece of thick plate glass and some smoky powder will fill in the late summer spare time of Peter Harris, 13-year-old president of suburban Leaside's Astronomy Club. Peter wants a telescope. He could spend several hundreds of dollars for a reflector, or make it himself. He is going to make a 12-inch reflector.

Espionage Work

United States Is Urged To Do A Little Ferreting

NEW YORK—The Daily News, basing its observations on the Royal Commission report on espionage at Ottawa, editorially urged the United States to "pull ourselves together and do a little counter-spying."

The newspaper has urged for some months that the government establish a large peace time espionage organization.

"The well-established Russian network in Canada had and has branches in this country, Ottawa warns us," said the News, "and this country has a lot more things to be ferreted out than has Canada. Also we have more numerous, willing contacts for all spies to work on, in the widespread Communist organizations and their various groups. . . .

"We have caught only one suspect so far, Lieut. Nicolai Redin, who is accused of trying to get away with the plans for a minor naval vessel. . . . What we need to meet the Russian competition is Two Spies for One."

ISSUE NEW COUPONS

A new series of sugar coupons for temporary ration cards has been issued by the ration administration, the Prices Board said. The new coupons are green and have a buffalo design instead of a beaver. Both buffalo and beaver coupons will now be recognized as valid ration documents for temporary ration card holders.

Eight million tons of food were grown in victory gardens as a result of daily newspaper campaigns in Canada and the United States.

The Medicine Cabinet

Can Be Real Menace If Old Remedies Are Kept

Possibly the majority of homes possess a medicine cabinet which is mainly used in emergencies. Usually it contains old medicines and is a sort of shrine of comfort as a chest of cures for all manner of ailments and accidents. Thus many a household cabinet contains dangerous bottles and condiments, a menace probably from their origin. The customary kind of first-aid for simple ailments may become a menace to the household. For bottles have cork which deteriorate from corrosion. The medicine may smell the same as when it was put up, but air has changed the substance within until it might be poisonous. Indeed, there sometimes is tragedy in a medicine cupboard not cleaned out and refurnished regularly. Evaporation can make a tonic into strychnine. It is good counsel, anyway, to get rid of old medicine at intervals and to re-stock the chest. Also the contents of bottles should be washed down the drains rather than be put into trash barrels.—Brandon Sun.

MANUSCRIPTS FOUND

Precious music manuscripts of Bach, Beethoven, Mendelssohn, Mozart and Brahms, which belonged to the Berlin State Library, have been found in various parts of Germany by the Allied occupation authorities, the British news service in Germany reported.

The Gulf Stream may vary from year to year in distance from the eastern coast of the United States as much as 100 miles, as well as in velocity and width.

LOOKING at her husband as though it were his fault, Amelia Ames complained, "this Chov Mien is too crumbly." The warm, grey eyes narrowed in annoyance. "Now don't tell me that is the way I ordered it, either. I know I said crisp but they didn't have to get it so brittle."

George Ames grinned good-naturedly and winked at his daughter and son-in-law. They started to smile, sobered as Mrs. Ames spoke again. "Judy, eat your Egg Foo Yung. It's good for you, and you need it. I think I'll have to come and spend another week with you and get you built up."

Judy opened her mouth to say something, then started eating. Ted frowned. "She weighs as much as she ever did," he said.

"Well, she would if it didn't watch over her. Look what happened when you moved to Albany. Poor Judy was worn out just from the packing up. If I hadn't gone right along with her and helped her get settled she'd have been in bed for a month. . . . and also I had to come up there every other week to see that she took care of herself. That's why I insisted that you move back here again near us so that I could keep a closer eye on her. Even now I hate to go off on this trip with George for fear she'll do something foolish."

George pulled out his watch. "We'd better hurry or we'll be late for the show."

The suggestion worked, for Amelia never liked to be late for anything. But George was uneasy, for he had an idea what was going through Ted's mind. The boy had a good healthy pride, and even though he was very much in love with Judy, there was a limit to some things. He hadn't learned yet that Amelia's crisp manner was just a cover up to hide a soft heart.

After they had left the young couple at their apartment and were on their way home, George ventured a suggestion. "Don't you think you're babying Judy a little too much? After all she is grown up and has been married a year."

Amelia almost drove through a stop light before she snapped. "Of course not. I know my daughter. She can't do things right without me. I've always looked after her, and I'll always have to."

George gave up. But it was time to do something about it. He lay

awake long that night as an idea formed.

At the office the next morning he stopped in the middle of preparations for a month's business trip through the west to phone Ted to lunch with him. It was going to take some careful planning to get around Amelia, but she has been born in Missouri and perhaps the old "show me" adage would work.

Things went along fairly smoothly for three weeks. New towns and new faces always appealed to Amelia. Then, on the day before they were to start their return trip, George came back to the hotel room to find her feverishly packing.

"We're leaving in an hour," she announced. "I got plane reservations by telling them that Judy was in a serious situation."

"Judy! What's happened?" "She . . . she . . . Oh, read the letter. It's there on the dresser."

George smothered a grin. "I don't see anything here to get excited about. It just says they've bought a ranch."

"Not only a ranch, but a cattle ranch," she almost shrieked. "Well, why not? That's what Ted studied for at college." Amelia ignored him. "Imagine taking poor Judy out to a place like that . . . twenty miles from the nearest town . . . and they've already moved. That letter over a week old. . . . Oh, my poor little baby, all alone in a deserted ranch house. I've got to get back there before she kills herself. . . ."

She snapped another bag shut. "George managed to send a telegram to Ted. 'Get out the Welcome mat and make it big.'"

Ted tried his best. He even had neighboring cowhands on horseback meet them at the ranch gate to escort their last half mile.

Amelia was impressed, but not fooled. She was looking for Judy. They found her at the ranch house, dressed in jeans, riding boots, and an orange silk shirt open at the throat.

Amelia gulp in disbelief. "Why, I was never so amazed in my life," she declared to George as they got into bed a few hours later. "My Judy, dressed like a movie cowgirl. . . . and proud of it. . . . and the house all in perfect order. . . . and she wouldn't let me do a thing!"

"That dinner wasn't bad either," George added. "Bad! It was perfect. I couldn't have done better myself. It's amazing," she repeated, almost regretfully.

George chuckled. "Well, isn't she your daughter?"

He would like to have seen Ted about now and said, "I told you so," as he recalled their lunch a month ago.

"Judy's really all that you could want her to be. Ted," he said. "Just give her a chance to break her own strings and get going by herself and you'll see."

Ted hadn't looked too convinced then, but he had the proof now. In fact when he had said goodbye, he had whispered, "She's a regular chip off the old block," and winked and nodded at Amelia.

Well-Kept Secret

Germany Had Knitting Machine for Making Runproof Hosiery

Runproof hosiery for women can be made by a knitting machine developed by the Germans, according to the U.S. commerce department. A team of experts digging around in Germany for new types of machines for the commerce department uncovered it. It is a novel warp knitting machine which produces a runproof reinforced hosiery fabric. The Germans held it a closely guarded secret during the war and permitted only a limited number to operate in a few Bavarian and Czechoslovakian mills. The one investigated by the team was found in Czechoslovakia.

FLY MENACE

Reminding Canadians that flies are germ-carriers, the Department of National Health and Welfare, Ottawa, has issued a reasonable warning in the war against these pests. It is advised that special care be taken this summer to check screens to keep flies out of buildings, particularly where there are young children.

Newsprint Production

Shows Increase During The First Six Months Of The Year

Newsprint production in Canada during the first six months of this year totalled 2,002,935 tons, marking an increase of 29.7 per cent. over the 1,544,913 tons for the same period in 1945, and shipments were 1,960,134 tons for an increase of 30.4 per cent. over the 1,503,362 tons shipped during the first six months of last year. Production during June was 334,207 tons against 266,417 during June, 1945, and shipments totalled 322,806 tons against 267,163 tons. The six-month production for the United States reached 387,685 tons, an increase of 5.5 per cent. over the 367,695 tons for the similar period of 1945, and shipments were 387,843 tons against 364,313 tons. June production totalled 61,241 tons against 60,828 tons during June, 1945, and shipments reached 61,671 tons against 56,492 tons.

RECIPES

CABBAGE AND APPLE SALAD

1 package Lemon Jell-O
2 cups hot water
1/2 cup shredded cabbage
4 teaspoons vinegar
1 teaspoon salt
1 cup diced red apples
1/2 cup chopped walnut meats
Dissolve Jell-O in hot water. Chill until slightly thickened. Combine cabbage, vinegar, and salt, and let stand about 20 minutes. Fold seasoned cabbage, apples, and nuts into Jell-O. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with dressing. Serve six.

SPICE CAKE

1/2 cup butter
1 cup brown sugar
2 eggs
1 cup chopped floured dates
1/2 cup cake flour
2 cups Melrose baking powder
Pinch of salt
1/2 tsp. cinnamon, cloves, and nutmeg
1 cup cold water
Method: Cream butter and sugar, add well beaten eggs, beat all together again—8-10 minutes. Add spices, at least three times, and add alternately with the water, starting with the flour, beat hard for at least three minutes, bake in a well greased loaf pan for about 45 minutes in 325 deg. F. A loiled icing is nice on this cake.

To Feel Right—Eat Right!

SIXTY ESCAPE IN NIGHT CLOTHES AS BUILDING BURNS—Early morning fire destroyed the main building of the Canadian Keswick Bible Conference near Fort Carling, Ont. forcing 60 persons to flee in night attire. Damage was set at \$100,000. This is an air view of the building.

CHINESE DELEGATION

Has Been in Ottawa Studying Canada's Post Office Methods
Representing the first Chinese postal delegation to visit Canada, four officials from the Director General of Posts of China, have been studying Canadian post office methods in Ottawa.

The Chinese officials left China in July, 1945, and spent six months in Washington and one month in New York studying U.S. postal improvements before coming to Ottawa. The delegation now are back in the United States where they will inspect postal facilities in Chicago and San Francisco before their return to China in September.

The delegation are studying the American and Canadian postal systems from the inner sanctum of the central organization to the outermost fringes. Each official looks after a particular division.

Fundamentally, the postal system of China is very similar to Canada's. They make use of air mail, postal notes, money orders and postal savings banks in the same way. Even their mechanical equipment is much the same, but their great difficulty is the lack of sufficient equipment to cope with the huge amount of mail. Despite inflation in China postal rates have been little affected and now are on a par with Canada's.

Mr. Chang, who specializes in equipment and supplies, praised the Canadian postal system for its economic and efficient methods.

"Canada, which manufactures more paper than any country in the world, has the most effective way of conserving paper in the post office that we've seen," said Mr. Chang.

The Chinese officials expressed gratitude and appreciation for the co-operation extended to them by Canadian postal authorities. Every opportunity was given them to make a careful study of the Canadian system.

Flying Nurse

Attends To The Sick Over A Wide Area In Australia

SYDNEY, Australia. — Travelling hundreds of miles through floods, duststorms or rain to attend the sick, is all in the day's work for Sister Myra Blanch, Australia's first "Flying Nurse". Appointed to the Flying Doctor Base at Broken Hill in the far west of New South Wales, she attends cases within a 500-mile radius, reaching her patients by whatever transport is available.

The Flying Doctor Service of Australia is an Australia-wide organization which provides medical aid to settlers in the far "outback" of the continent. In it, medicine, aviation and nursing are combined in a unique service of goodwill. There are eight bases throughout Australia, each covering a radius of about 500 miles. At each base there is a doctor and at least one plane, fully equipped with medical supplies and stretchers. Sometimes Sister Blanch accompanies the doctor on his trips, but she frequently sets out on a solitary journey to reach some case the doctor is too busy to attend. Nearly always the journeys are long and arduous, but she finds the discomforts worth while.

Stamp Collection

Historic Envelopes Were Auctioned

NEW YORK.—A set of six envelopes commemorating the Royal Visit to Canada and the United States in 1859 was auctioned for \$40, at the third and final disposal of the stamp collection of the late President Roosevelt. The Canadian envelopes were postmarked June 7, 12 and 13. The American covers were cancelled June 10 and 11. All envelopes carried the Royal Canadian postmark and were addressed to President Roosevelt at the White House in Washington.

SMALLPOX THREAT

In view of a "definite risk" of scattered outbreaks of smallpox in Canada, the Canadian Medical Association Journal, in its current issue, urges a campaign in support of vaccination and re-vaccination. Heavy postwar travel is facilitating spread of smallpox into areas relatively free, the Journal reports.

BEAUTY QUEEN of the Calgary Stampede is lovely Patay Rodgers, of Calgary, seen in the parade of cowgirls. She will star in a big rodeo in New York next October.

SMILE AWHILE

Caller: "I am so sorry your mistress is out. Do you think she will be at home this evening?"
Maid: "She'll have to be; it's my night out."

Junior: "What's gossip, Dad?"
Dad: "Anything that goes in one ear and over the back fence."

"My wife always gets historical when I stay out late at night."
"Historical, you mean?"
"No, historical. She digs up all my past."

"Boy, am I hungry."
"Why?"
"It must be something I didn't eat."

"Could you pay for an operation if I thought one was necessary?"
"Would you think one was necessary if I couldn't pay for it?"

"I ordered a dozen oranges, but you only sent me ten."
"Part of our service, madam. Ten were bad, so we saved you the trouble of throwing them away."

"What do you think of the latest news of the foreign situation, Senator?"

"Don't bother me. I gotta get on the radio and talk. In a crisis like this there is no time to think."

"My husband is away so much I want a parrot for company. Does this one use rough language?"
"Lady, with this bird in the house you'd never miss your husband!"

Guest: Look here! How long must I wait for the half portion of duck I ordered?
Waitress: "Till somebody orders the other half. We can't go out and kill half a duck."

Bill: "These are the ruins of a castle built by William the Conqueror."
Wealthy Aunt: "Yes, but why on earth did he build it so far from the railway station?"

Proprietor: "You came into my restaurant, you order a glass of water, you drink it, and you calmly walk out!"
Scott: "What were you expecting me to do, mon? Stagger out?"

"Good morning," came the cheerful voice over the telephone.
"This is Morrison. Morrison & Morrison."

"Oh!" returned the startled voice at the other end of the wire. "Good morning, good morning and good morning." 2683

Yokes Form Sleeves

By ANNE ADAMS

Surf-succesd style for active or spectator sports in this really smart, new shortwaister! Pattern 4529 is simple to sew and simply delightful to wear.

Pattern 4529 comes in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32. Size 16 takes 2 1/2 yards 39 inch. Send twenty cents (20c) in coins (stamps cannot be accepted) for pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

HOME SAFETY

It is unsafe to leave an infant on a high table, unprotected bed, or on unguarded high place, even for an instant, warns the Department of National Health and Welfare, Ottawa. If mothers must turn to something else for a moment, after placing a child in such a place, they are urged to avoid home accidents by picking up and holding the child, or placing the little one back in the crib. Babies, it is pointed out, squirm so quickly, and may fall if a mother allows her attention to be diverted even momentarily.

HEMORRHOIDS

2 Special Remedies by the Makers of Mecca Ointment

This Mecca Ointment is a special Hemorrhoid Remedy, and is sold in Tube, with applicator, and in Jar, with applicator. Hemorrhoid No. 2 is for External Hemorrhoids. Hemorrhoid No. 1 is for Internal Hemorrhoids. Order by number from your Druggist.

HOUSEWIVES!!

This new medicine is very effective in relieving pain, itching, and swelling, and is sold in Tube, with applicator, and in Jar, with applicator. Hemorrhoid No. 2 is for External Hemorrhoids. Hemorrhoid No. 1 is for Internal Hemorrhoids. Order by number from your Druggist.

J. R. McLEOD, PUBLISHER

Blaimore, Alta., Friday, Aug. 2, 1946

With this issue of the paper, our readers will note a change in name, as well as publisher. In its colorful career, this paper has been known under several names as The Blaimore Times and Crows' Nest Pass Advocate under Harry J. Matheson, from 1904 to 1909; then The Blaimore Enterprise and Frank Vindicator, under Barrett & McDonald; later in 1910 as The Blaimore Enterprise, under the late editor W. J. Bartlett, so a change of name to The Blaimore Graphic is in keeping with the various stages.

This does not mean a change in policy; endeavor will be made to carry on tradition established by predecessors and all contracts will be executed as if no change had been made, and all commercial printing will be promptly and efficiently looked after.

HEALTH IN THE OPEN

Health authorities at Ottawa urge all Canadians to make a point of getting out of doors early after supper, this summer. "Do anything you like—even if it's only exercising the dog around the block," says an authority in the department of national health and welfare, "do some gardening, walk, play tennis, or anything which will keep you in the fresh air when the weather is fine." For those who are house bound, sitting by an open window in summer, or on the porch, is also recommended.

Mrs. Martin Foster and Miss Rose Steffler, of Guelph, Ontario, and Mrs. George Baines, of Calgary, are visiting here at the home of Mr. and Mrs. C. Gilmar, and are going on to the coast to spend a few weeks with Mrs. McEwen, at Gibson Landing, B.C.

ATLEE APPEALS FOR SPIRITUAL LEADERSHIP

(By Lewis Milligan)

Prime Minister Atlee, speaking at the annual assembly of the Church of Scotland recently, ventured to deliver a little sermon to the ministers of that body on the need for spiritual leadership. He spoke in these words: "No social system will bring us happiness, health and prosperity unless it is inspired by something greater than materialism. The world today has need of spiritual leadership. Whatever the difference between the various churches, they are at one in holding before mankind absolute values in setting standards of conduct beyond that of self-interest of the individual, the group or the nation."

Coming from the head of a Labor government which came to power by promising to set up a social system that was to bring happiness, health

and prosperity to the people by materialistic means, this appeal for spiritual leadership and its admission of the futility of social systems to ensure human welfare is rather belated—or is it that Mr. Atlee has learned these basic truths from experience in the past year?

In England recently I attended a number of services in churches of various denominations in the cities and the small towns; and I was depressed to find them so poorly attended. At one morning service in a Congregational church, located in a densely populated suburb of a large city, there were not more than ten or fifteen adults present, including the minister and the organist. There was no choir. At a Wesleyan church in a small town there were about twenty-five present at a morning service, and at the evening service in the leading Anglican church in the same town, the choir, all boys, was larger than the congregation. The Central Hall in London, which was built to accommodate the crowds which flocked to services in former days, was three-quarters empty at the morning service, although the was a special American preacher for the day, and there was a very fine choir.

I did not attend any of the Evangelical convocations, but I was told that these were very much better attended, and that they were more popular with the working people. In all the large cities the motion picture theatres are open on Sundays and there are as well if not better attended than on week days. There are also Sunday sports which attract a large following.

Judging by my conversations with various types of people, in Britain and particularly with working men, I would say that they were intensely interested in politics. On the one hand the anti-socialists are either pessimistic about the future or they believe the people will soon tire of the

continuance of wartime restrictions. The working people, on the other hand are expecting great things from the Labor government. Mr. Atlee's appeal to the churches for spiritual leadership and his warning that no social system can bring happiness, health and prosperity, may be intended as a hint to the workers not to expect too much from his government.

My own opinion is that the working people of Britain are not and never could be Socialists, and their present indifference toward the churches is due in part to the state of socialist propaganda which assumed the form of a religious crusade. A Glasgow man explained this situation to me by saying that the working people of Britain had been "kept down" and had not enjoyed the privileges which are common to the people of Canada and the United States. He said, for instance, that if a working man were to own a motor car his employer would accuse him of extravagance and claim that he was getting too high wages. During the war, however, non-working people earned big wages and they have still more money than they can spend on the necessities of life. This sudden acquisition of money, said the Glasgow man, had "gone to the people's head" and they believe that socialism will continue the war-time prosperity.

There may be a good deal of truth in that diagnosis, but the British people, although they continue to submit to strict governmental discipline, are too free-thinking to submit to any form of permanent dictatorship. For one thing, they are too argumentative, and there are signs that they are already arguing themselves out of Socialism as they argued themselves into it. They are discovering that their political ideal is not communism, Russia, but democratic Canada. The British people are also essentially religious, and "when they have spent all," they will return.

...All ticked off Mr. Timpkins?

Being in the nature of a reminder of how the Royal Bank can help to make your holiday happy and carefree.

1. Make sure your valuables are safely tucked away in your Safe Deposit Box. Or show them in our vaults for safe-keeping. The cost is trifling. Ask at any branch.

2. Change your reserve cash into Travellers' Cheques... the safe worry-free way to carry travel funds. As good as money anywhere. If you lose them, you're not out a cent.

3. Should you run short of cash during your trip call on the nearest Royal Bank branch. The local manager is your direct line of communication back to your own home branch.

4. Arrange to have your salary or other income credited to your account in your absence. Clean up unpaid bills with Cheques against your Royal Bank account or mail Royal Bank Money Orders.

5. Should you wish to combine business with pleasure you will find the local Royal Bank Manager in any district a mine of information on local business conditions.

6. If you are travelling abroad, remember The Royal Bank operates branches in the West Indies, Central and South America, New York, London and Paris... each branch a home-from-home in all financial matters.

United States Tourists are cordially invited to use our branches for cashing Travellers' Cheques, negotiating Letters of Credit or for any banking service.

The
Blaimore Graphic

In Alberta we have a great heritage in our forests and streams. If our forests are blackened and ruined by fire instead of forest industries supplying the building material we require and providing a living directly and indirectly for thousands of people, instead of our shady playgrounds, big game, fur bearing animals and our pleasant streams, what are we going to have? A ruined industry, raising torrents in the spring and dry water courses in the

summer, soil erosion and all the other ills that occur in any country where the balance of nature is upset by the destruction of a great part of the forest.

Your local ranger contends that a lot of good citizens live in his district. He takes this opportunity to thank you for the co-operation you gave him last year and he is sure the more you realize the situation, the more he can count on your co-operation and assistance.

Fast Freight!

You've heard those thundering wheels...seen that stabbing headlight...as you've watched a long train of Canadian Pacific freight cars rumble through the night.

They are hauling more—much more—than just overnight freight. To children and grown-ups in destitute Europe and Asia, those turning wheels are bringing new hope...perhaps life itself.

To all of us they are bringing food, coal, building materials, household furnishings, lumber, paper, machinery—all the thousand-and-one items which make up a nation's domestic and export trade. And they are doing it efficiently and cheaply...every day and night in the year!

Canadian Pacific

COAST-TO-COAST
KELLOGG'S ARE CANADA'Schoice
for
any meal
anytime!

Want an idea that will help you save time and work—and at the same time keep meals more interesting for your family? Thousands feature Kellogg's not only for breakfast but for quick snacks anytime of day! PEP, Corn Flakes, All-Bran, Rice Krispies, Bran Flakes, Krumbles and All-Wheat are all made by Kellogg's, the greatest name in cereals!

PEP Bran Flakes with other parts of Canadian whole wheat are delicious, extra crisp, extra thick. Your whole family will enjoy Kellogg's PEP.

SAVE TIME...SAVE FUEL...SAVE FOOD!

The Making Of One World

AMONG THE MOST IMPORTANT factors in the making of the "one world" about which we hear so much today, is the airplane. It, more than anything else, has reduced the distance between countries, and continents and made the world, indeed, into a relatively small neighborhood. Records show that in the span of a little over one hundred years the rate of travel has increased from ten miles an hour, which was the average speed of the best stage coaches in England around the year 1830, to the present ordinary air speed of 300 miles per hour. In addition, we now have rocket ships which travel at six hundred miles an hour, and it is expected that the newest and largest airplanes, powered by jet-propulsion, will cross the Atlantic Ocean in five hours.

Has Raised Many
New Problems

The development of air travel has not only lessened the distance between countries from the point of view of travelling time but it has altered their relative geographic positions. Commenting on this in a recent article published by the Royal Bank of Canada, the writer says: "Air travel has raised many new problems for international solution, as well as pointing out some old ones. Before development of the airplane, Mercator's map was all right. It did exaggerate the size of some countries, Greenland, for instance, but it was a good enough map for surface navigators. An air map is quite different. In the centre of the air map showing the northern hemisphere there is a dot indicating the north pole. Scattered over the circle are smaller dots representing cities. Reykjavik is a dot about an inch from Montreal. Moscow is another point an inch beyond, and another inch takes one to Aden. Winnipeg is a inch from Nome, and two inches from Tokyo. No boundary lines on the air map say, 'This is Canada', or 'This is Iceland', or 'This is Japan'. If a man wished to leave Toronto for a flying visit to South Africa, he might be tempted by the Mercator map to go by way of Miami, Natal, (in Brazil), trans-Atlantic to West Africa, and thence south, but the air map shows that his shorter route is by way of Montreal, Labrador, and Europe."

Profound Effect
On The Future

It is doubtful whether the full effect which modern developments in aviation will have on the world are yet completely realized. Canadians have become accustomed to the idea of crossing this continent from Halifax to Vancouver by air in less than twelve hours, but the advantages of long distance flights overseas have not yet become commonplace to the average citizen. It is possible now, however, for a traveller to fly between Eastern Canada and any capital in Europe in considerably less than twenty-four hours. The airplane has similarly lessened the distances over the vast stretches of the Pacific Ocean and has, indeed, almost overnight linked up countries and continents, and made us realize that there are few, if any remote places remaining in the world. In our effort to win the war, tremendous advances have been made in aircraft construction and flying technique, and these advances will have a profound effect on life in the years to come.

Price Control
And Rationing
Information

Q.—I have several meat coupons and also meat tokens which I will not be using. I am going to turn these in to the Local Ration Board so that more meat will be available for shipment overseas. I am not sure if I should turn in the tokens as well as the coupons.

A.—The meat tokens are just as valuable as the meat coupon. These may be turned in to your Local Ration Board. Local voluntary organizations will also be collecting these tokens and coupons, and a list of the organizations may be obtained from the Local Ration Board.

Q.—When will ration book 6 be distributed?

A.—Ration book 6 will be distributed during the week September 9 to September 16.

Q.—When will the first ration coupons be valid in ration book 6?

A.—The first coupons in ration book 6 become valid September 19. Latecomers' books will not be issued until September 30, and they will therefore not be able to purchase their rationed commodities until they receive their new book. You should make every effort to obtain your new book in the distribution period.

Q.—Must I present my ration book No. 5 when I go for my new book?

A.—You must have your ration book five with you. It is necessary for you to fill in the green RB 191 card which is in the ration book you now have.

Q.—When will I go for my new book?

A.—You must have your ration book five with you. It is necessary for you to fill in the green RB 191 card which is in the ration book you now have.

Regina Rifles

Eric Luxton, A Former Member, Receiver Appointment

Former member of the Regina Rifles, Eric Luxton who fought during the European campaign from

Can to the end of hostilities, recently succeeded Gordon Bigelow as executive officer of the Regina Citizens' Rehabilitation Committee. Bigelow is now with the Saskatchewan Reconstruction Housing Corporation.

Luxton enlisted in June 1941, as a lieutenant and was posted to the Regina Rifles on his arrival in the U.K. the following April. During the D-day landings, he was instructing in England but he rejoined his regiment in France just north of Caen and was promoted to captain at the same time. He commanded the regiment's anti-tank platoon in the

Luxton saw plenty of action but returned to Canada unscathed last June. He was awarded a mention-in-dispatch and had been developed as an Army Counselling service staff and was discharged last month when he commenced his new duties. He and his wife have a small daughter. Luxton plans to return to university and complete the studies he began prior to the war.

Gasoline Ration

Has Been Increased Since U.S. Loan Was Made

LONDON.—Fuel Minister Shinwell told the House of Commons that the basic British gasoline ration will be increased 50 per cent because of purchases made possible by the \$3,750,000,000 loan from the United States.

The increase will allow pleasure automobiles to be driven about 270 miles a month instead of the present 180 miles. Mr. Shinwell said a rather more generous allowance would be made for essential industrial users.

BOTH WERE INVENTORS

Ell Whitney invented the cotton gin and in 1858 Ell Whitney Blake of New Haven, Conn., no relation—

invented a stone crusher that made possible the economical construction of highways on a large scale.

Government Concept

British Crown Will Always Be A Unifying Force

The British Crown is a unifying, rather than a divisive force in a Commonwealth which demands a symbol to bolster its unity during the transition from Empire to a new form of international society. The Royal Family is the object of widespread respect and affection, and it is not easy to see just what concept could supplant it, should Britain turn to republican forms.

The structure of the Commonwealth is quite different from that of the United States, where a single flag has become accepted as the rallying sign for the people. There are several flags in the British Commonwealth today and there may be more.—New York Herald Tribune

NOT EVEN LOOKS

The theatrical producer was interviewing applicants for the new show. The first girl came in and he asked: "Can you dance?"

"No," the girl replied.

"Can you sing?"

"No."

"Well, can you act?"

"Not very well."

"Then what did you come here for?"

"My looks."

"Well, you can have a look round, if you like, but I don't think you'll find them here."

SOME SPECIAL CROPS

Are Very Important And Contribute Greatly To Farm Income

Many people think of Canadian crop production in terms of wheat, oats and barley. There are, however, a number of crops which occupy smaller areas but contribute substantially to cash farm income in those areas in which they are grown. These include tobacco, sugar beets, soybeans, sunflowers, rape seed, honey and maple products.

Sugar beets, for instance, are grown in fairly well defined areas in four provinces but favorable conditions for production of this crop exist in other large sections of the country. High labor requirements and competition from intensive crops restrict the area of the sugar beet crop. In Ontario, beets are grown in Essex, Kent, Elgin, Middlesex and Lambton counties. The production from this area was at one time the sole Canadian supply of best sugar. Factories are located at Chatham and Wallaceburg. In recent years, however, beet production has been shifted to a new factory at Fort Garry. Later another new factory was built at St. Hyacinthe, Quebec and operation began in 1944.

During recent years, and chiefly since the outbreak of war, great progress has been made in mechanizing the production of beets. In earlier years, contract labor was employed on a large scale. With the shortage of labor in wartime, the problem was met in part by the utilization of prisoners of war but it had to be dealt with on a more permanent basis. Thus planters have been improved so that a more even stand could be obtained. Thinning and block-dispatching machines have been developed. Harvesting and topping and unloading machines have been introduced on many farms. The supply of these machines is still small and some improvements are still to be overcome, but the back-breaking work in handling beets on the farm is on the way out. At the factory, mechanical unloading and handling have been successfully applied.

GEMS OF THOUGHT

FIRMNESS

Firmness of purpose is one of the most necessary sinews of character, and one of the best instruments of success.—Chesford.

The superior man is firm in the right way, and not merely firm.—Confucius.

The firm, without pliancy, and the pliant, without firmness, resembles a vessel without water, and water without vessels.—Lao-tse.

Steadfastness is a noble quality, but, unguided by knowledge or humility, it becomes rashness, or obstinacy.—Swartz.

Every man and woman should be today a law to himself, herself—a law of loyalty to Jesus' Sermon on the Mount.—Mary Baker Eddy.

It is wonderful what strength of purpose and boldness and energy of will are roused by the assurance that we are doing our duty.—Scott.

There is a higher death rate among stable hands and hostlers between the ages of 15 and 24 than in any other gainfully employed group.

Statue Is Back

Winged God Of Love Again On Pedestal In London

London's best-loved statue has returned to Piccadilly.

Eros, winged god of love, has been taken from his wartime hiding place in Surrey and placed on his old pedestal in Piccadilly circus for the first time in seven years.

Since V-E day Londoners have been used to their absence for return of the famed statue, unveiled in 1888 as a memorial to the Earl of Shaftesbury.

While Eros was away, savings posters sprouted at his old stand and became a familiar sight to servicemen from Canada and other Allied countries.

Perfect rubies are much rarer than good diamonds.

STANDARD BRANDS LIMITED

New Calgary Fleischmann's Yeast Plant

Standard Brands Limited, "but so many developments have come out of biochemical technological research in the Fleischmann Laboratories, under the pressure of wartime needs, that it will be possible to incorporate a whole series of improvements in manufacture in the new Calgary plant."

Mr. Cunliffe explained the reasons for the company's choice of Calgary as the site of the new establishment. "The city is a living plant, an organism, is extremely sensitive to conditions of atmosphere and water supply. Fleischmann Laboratory analysts, testing water in every district in Western Canada, found that Calgary has ideal water for yeast manufacture. The clear air in this district is also beneficial in the production of high quality yeast."

While the new plant will be devoted initially to yeast manufacture, local production of other products of Standard Brands Limited, for Western distribution, would be a logical development in the future. Mr. Cunliffe stated. Calgary possesses import and export facilities for manufacturing, including abundant fuel and power, and is ideally situated to serve the rapidly growing Western market, he said.

HALF MILLION DOLLAR YEAST PLANT

Ground has been broken for construction of Calgary's new half million dollar Fleischmann's Yeast plant.

The new plant, on 15th street, south of the Calgary Brewing & Malting Company, will be one of the most modern yeast plants in the world. It will supply fresh yeast to the huge market of bread bakers, commercial and domestic, throughout Western Canada. Operation is expected to commence early in 1947.

"We thought that our modern plant in Eastern Canada was the last word in yeast manufacturing," said William L. Cunliffe, President of

Standard Brands Limited, "but so many developments have come out of biochemical technological research in the Fleischmann Laboratories, under the pressure of wartime needs, that it will be possible to incorporate a whole series of improvements in manufacture in the new Calgary plant."

Raise Issue On The Question Of Taxation

OTTAWA.—An understanding between the Dominion and Saskatchewan is being sought by the province as to its liability for payment of \$12,000,000 in provincial treasury bills, now held by Ottawa.

Saskatchewan wants to know just how much of the total of these bills will be liable for payment at some future date.

The bills were incurred by the province during the drought period for relief and seed grain.

The Saskatchewan government is seeking such an understanding before it enters into an interim agreement with the Dominion government to vacate certain taxation fields based on the budget proposals to the provinces.

Hon. C. M. Fines, provincial treasurer of Saskatchewan, accompanied by his deputy, Thomas Lax, was in conference with Hon. Douglas Abbott, acting minister of finance, and Dr. W. C. Clark, deputy finance minister at Ottawa.

Mr. Fines confirmed that the \$92,000,000 Saskatchewan debt was discussed.

Manitoba is indebted to the Dominion by \$24,700,000, British Columbia by \$34,370,000 and Alberta by \$25,870,000. The debts of these three provinces accrued under the Relief Act.

Premier T. C. Douglas, of Saskatchewan, has taken the stand that before entering into any agreement with Ottawa, involving the giving up of taxation fields, the provincial government would require an understanding that Ottawa would demand for the relief obligations except under terms of an agreement which the province would negotiate with the Dominion government. The federal government has refused to give up the right of set-off in any agreement which it signs.

As a result, Saskatchewan points out it could not sign an agreement under which the Dominion could withhold the province's entire subsidy or a substantial portion of it by applying it against the treasury bills which Ottawa now holds.

The right to set-off with regard to future obligations Saskatchewan is prepared to agree to, but it wants an understanding in regard to that right involving the millions incurred during the drought and depression period.

Commenting on the budget proposals for agreements with the provinces, Mr. Fines in an interview pointed out that under the plan submitted by Ottawa to the Dominion-provincial conference this spring, Saskatchewan would have benefited to the extent of \$33,000,000.

Under the budget proposals Saskatchewan will only benefit by \$13,300,000.

"Saskatchewan is giving up everything it was called upon to give up under the more generous Dominion-provincial proposal including the succession duty, income tax and corporation tax fields and in return we are getting \$39,000,000 less."

This means Saskatchewan is left without the social security that would have been possible under the offer to the conference," Mr. Fines said.

ANOTHER PROBLEM

Britain Facing Crisis This Winter In Short Coal Supply

LONDON.—Britain's coal shortage, a constant threat in war, is providing an equal peril in peacetime.

For the fifth year in succession, nobody can say definitely whether the country will or will not be able to keep going during the winter.

The coal problem assumes crisis proportions in 1940 after the government allowed a number of coal miners to leave the pits for the armed forces or war factories. As the war developed, the demand of munition factories and other establishments grew tremendously and the mining industry's manpower reserves were thin.

Falling output per man—accentuated by a deterioration in physical standards—was another factor.

Today British coal mines still are short of workers.

Nationalization of the mines by the Labor government may improve the situation, but as yet the government has not had time to mechanize the industry to a level comparable with that in the United States coal mines.

Mr. Shewan's vulnerable position is complicated by the expansion of British export industry. Demands for coal, electricity and coke for industrial purposes are steadily rising.

Domestic consumption is still on the increase, fed by the large number of electrical appliances now available to the public.

One disability which seems permanent is that many miners who left the pits during the war show no inclination to return.

WILL TOUR CANADA
BRISTOL, Eng.—A standard production model of the Bristol 170, first post-war British civil airliner to obtain an unrestricted certificate of airworthiness, soon will tour Canada, the United States and Latin America on a demonstration tour. 2683

VETS SAIL SCHOONER HALIFAX TO GREAT LAKES—"It's heaven and away we go to the Great Lakes" for Bill Higginson, Three Rivers, Que., and fellow townsman, Geoff Clewer. The two former Canadian navy men plan to sail their 40-foot, 11-ton schooner Lady Nell from Halifax to the Great Lakes. "Skipper" Bill and "crew" Geoff installed a 30-horsepower marine engine before setting sail. Higginson bought the schooner in 1944 and has sailed the tiny vessel up and down the coast for the past two summers.

Further Light Shed On China's Internal Strife

SHANGHAI.—Madame Sun Yat-Sen, widow of the founder of the Chinese republic and sister-in-law of its present leader, Chiang Kai-shek, said in a rare interview that a desire to promote war between the United States and Russia motivates Kuomintang (government party) reactionaries seeking to stir up civil war.

Inactive in politics for years, she came out of semi-retirement to urge immediate establishment of a coalition government in the country now headed by her brother-in-law and to appeal to the United States to foster such a move by cutting off all military supplies to China.

Madame Sun said that Kuomintang reactionaries were fostering a civil war they can't win "because they hope civil conflict in China will inflame war between America and the U.S.S.R. and thus at last crush Chinese Communists."

"The American people, who are allies and long friends of China, must be clearly told of this road to disaster," she said.

"They must be told that American reactionaries are teaming up with Chinese reactionaries, each encouraging the other. They must be told that the presence of United States armed forces on Chinese soil is not strengthening peace and order among the Chinese people."

SERVED PURPOSE

Liner Queen Mary May Be Withdrawn From Transport Service

SOUTHAMPTON, England.—After two more trips, the Queen Mary is expected to be withdrawn from service as a transport carrying dependents of servicemen to Canada.

It could not be confirmed immediately whether the Queen Mary would be replaced by other tonnage but the expectation was that this would be unlikely, since the number of dependents still in the United Kingdom has been cut to about 20,000.

(A Canadian Press despatch from Southampton placed the number awaiting movement to Canada as 15,070 wives and 4,830 children).

Movement of dependents from the continent to Canada will be started shortly with the Lady Rodney assigned to a shuttle service from a continental port to Tilbury near London. Dependents will be taken from London by train to Southampton for loading on big ships like the Aquitania.

NOW TROOP TRANSPORT

LONDON. The Prince Henry, former Canadian National Steamships luxury liner bought by the British transport ministry from the Canadian War Assets Corporation for £125,000 (\$500,000), will be used as a troop transport. Built at Birkenhead 16 years ago for Pacific coast service the ship registers 6,993 tons.

ALBERTA SALT WELLS

CALGARY.—Not only oil but salt may be the objective of the Central Plains drilling search. The Elk Point No. 1 completed at 3,929 feet encountered salt beds to a thickness of 700 feet, officials of a Calgary oil firm announced. The casing is being left in the hole to permit utilization as a salt well if desired.

Empire Defence Measures Will Be Soon Taken

LONDON.—Unobtrusive steps are being taken to assess and improve commonwealth and empire defence organization and to keep abreast of developments in military science, The Canadian Press learned.

London quarters cited:

1. Field Marshal Viscount Montgomery is to visit Canada and the United States shortly and it is anticipated that he will gather and give opinions on defence matters. Lord Montgomery recently succeeded Lord Alanbrooke as chief of the Imperial general staff.

2. Strengthening of military missions and free defence consultations between the Dominions and the United Kingdom are expected to develop following commonwealth consultations in London last spring.

- 3.—Britain will keep the Dominions informed on the progress of vital experiments with rockets and other new weapons in the "dead centre" region of Australia.

4. Commonwealth defence planning assumes a lasting friendship with United States London is known to look with a kindly eye on arrangements for joint defence proposed by Canada and the United States.

5. Continued study is being given to standardization of weapons used by commonwealth countries. Canada and United States are likely to agree on common gun bores and other standards and the possibility is seen that other commonwealth units will seek similar arrangements with United States.

All discussions of commonwealth defence by United Kingdom officials are prefaced by two statements: first, that they look forward to the United Nations eventually taking over international defence duties; and second, that the commonwealth governments are independent and make their own decisions, London simply being the seat of one of the governments.

TAKES NEW JOB

MONTREAL.—Sir Frederick Bowhill, who superintended the ferrying of thousands of bombers from Montreal airport to all parts of the world during the war, has left his post here as United Kingdom representative on the council of the provisional international civil aviation organization to take up a new position in the British ministry of civil aviation.

Poland has exported 100,000 tons of cement to the Soviet Union in six months.

NEHRU AND GANDHI BOTH APPROVE BRITISH INDEPENDENCE PLAN—Political and spiritual heads, respectively, of the All-India Congress party, Pandit Nehru, left, and Mohandas Gandhi, appear an intermission chuckle at party session in Bombay. Both approve British independence plan though Nehru would drop Britain.

NEW NATION BORN AS PHILIPPINES BECOMES INDEPENDENT—Independence came to the Philippines July 4 under Manuel Roxas, president of the newly formed republic. Here, Roxas, centre, signs agreement establishing diplomatic relations with the U.S. as Chief Justice M. V. Moran, left, looks on.

May Sign Jap Peace Treaty Next Spring

TOKYO.—Allied occupation of Japan has developed so successfully that a final peace treaty may be signed next spring and the original occupation estimate of from five to 15 years radically reduced, it was believed in high Allied quarters.

The chief remaining bar to signature of a final peace treaty in the opinion of high Allied quarters was said to be the question of reparations.

Supreme headquarters here do not deal with reparations questions but it was believed there might be differences of opinion with Russia on reparations which might block efforts to sign an early Japanese peace treaty.

It was said here that if reparations can be fixed and if no other inter-Allied differences arise there should be no reason why a final peace treaty could not be signed possibly as early as 20 months after the July 26 anniversary of the Potsdam declaration.

That would mean a peace treaty next spring.

One stumbling block on the reparations issue was said to be the status of machinery and other materials removed by Russia from Manchuria and Korea. Russia is said to regard these supplies as at hundreds of millions of yen—as "war booty" rather than reparations.

Once the peace treaty is signed it was said the Japanese government of Japan might be settled much more rapidly than originally supposed. Some quarters it was thought a time limit on its occupation might even be set before the end of this year.

Allied officials were said to believe generally that the bulk of the occupation forces should be withdrawn as soon as feasible. They believe the difficulty of military occupation increase in direct ratio with the length of the force's stay in the occupied land.

They point out that there has been no indication of any extensive effort by the Japanese ultra-Nationalists to re-establish themselves and that the Japanese have shown great willingness to accept the fact of their defeat and seem to be interested in re-establishing themselves as a nation worthy of international respect.

THE VETO QUESTION

Russia Definitely Holds Opinion It Should Not Be Changed

NEW YORK.—Russia holds the firm, definite and final conviction that the veto in the United Nations security council should stand unchanged, it was reliably reported in Soviet circles.

This was the first Russian reaction on the veto question since Dr. Herbert V. Evatt, Australian foreign minister, attacked the veto in a recent broadcast address.

Dr. Evatt, long a foe of the veto, also has formally requested the UN secretary-general to place the question on the agenda of the UN general assembly meeting beginning Sept. 23.

Reliable sources in Russian quarters said that the Soviet position on the veto is firm, no matter how many speeches are made on it in general assembly debate or however it is attacked.

These sources emphasized that Russia feels the unanimity of the big powers is too important; that there should be nothing to minimize the importance of the United Nations charter as it now stands.

MEAT FROM CANADA

Supply Sent This Year To Hunger Zones Totals 50,154,799 Pounds

OTTAWA.—Figures released by the Canadian meat board show that in the week ending July 15, 2,469,384 pounds of canned meat were shipped to UNRRA authorities for distribution in the hunger zones. Of this consignment, 1,979,516 pounds were consigned to Austria and the remaining 490,868 pounds to Italy.

This latest consignment brings to a grand total of 50,154,799 pounds the amount of canned meat purchased and shipped overseas by the board since Jan. 1, 1946. The greater part of the shipments are destined for the relief of famine countries under UNRRA supervision, but during the period France also received 5,000,145 pounds and Belgium 7,206,374 of the canned meat supplies.

FINE CONTRIBUTION
MONTREAL.—Dr. A. Stewart Allen, who arrived in Montreal by plane after four months in China where he examined the administration of the Canadian Chinese War Relief Fund and established the fund committee at Shanghai, termed the contribution of \$5,000,000 by the Canadian public to Chinese relief as "magnificent."

GRANTED CREDIT
WASHINGTON.—The Netherlands East Indies was granted a United States credit of \$100,000,000 to purchase United States army and navy surplus property. The agreement provides for repayment in seven years at an interest rate of 2½%.

Local and General Items

Frank Sylvestre is holidaying at Fairmont, B.C.

Mrs. Mike Czeck left yesterday via TCA to join her husband at Yellowknife.

Mrs. Angelo Orlando returned from a month's vacation spent at Kelowna and Victoria.

Mrs. Floyd Hottle, of Calgary, is spending a vacation at the home of Mrs. Ennis, Sr.

Marie Youngberg, of Hillcrest, spent last week visiting her grandmother, Mrs. S. J. Lamey.

Blairmore Public Library will open Saturday evenings only, 6 to 8 p.m., until after September 7th.

Mr. and Mrs. Wm. Cox Jr. and family have returned from a ten day fishing trip spent at the Gap.

Miss Carlotta Fleming spent two weeks vacationing at her home here and returned to Regina last week.

Mr. and Mrs. Johnny Gresak and son, of Bellevue, are spending a short vacation visiting friends and relatives in Lethbridge.

Born to Mr. and Mrs. Norman Anderson at Perry's Maternity Home on Friday, July 26, a daughter, Margaret Evelyn.

Mr. and Mrs. Alex. McVey and daughter, of Luscar, are spending a week's holiday with the former's parents, Mr. and Mrs. W. McVey.

Mrs. Walter Smith, accompanied by her grand-niece, little Sandra Bolderson, of Calgary, visited the former's brother, Mr. George Salter, the first part of the week.

Mrs. A. Gibeau, of Calgary, arrived back from Cranbrook after spending two weeks as the guest of Mr. and Mrs. G. A. Passmore, former Blairmoreites.

Mr. and Mrs. W. A. Irving, with their daughter and a pal of their son, of Drumheller, called yesterday on relatives and friends in Bellevue and Blairmore, enroute to Portland, Oregon.

The work of renovating the interior of the Blairmore United church has been completed; floors painted, pews sawed and varnished and all other woodwork varnished. The men of the congregation are to be congratulated on their excellent workmanship.

Mrs. I. Bovio returned on Sunday from a month's visit with a brother in Salt Lake City. She was accompanied by her grandson, Gary Krkocky and made the return journey via a Western Air Lines plane. Her daughters, Mrs. V. Krkocky, of Blairmore, and Mrs. J. Ruyssackers and son Daryl, of Bellevue; accompanied by Mrs. G. Martini and Sandra, of Blairmore, met them at Lethbridge and motored home.

Home-makers, and particularly those responsible for preparation of family menus, are reminded by the department of national health and welfare, Ottawa, of importance of carefully-selected foods in insuring health, both mental and physical, and in maintaining morale. Literature on the healthful foods is available, on request, from the provincial health department.

It is unsafe to leave an infant on a high table, unprotected bed, or other unguarded high place, even for an instant, warns the department of national health and welfare, Ottawa. If mothers must turn to something else for a moment, after placing the child in such a place, they are urged to avoid home accidents by picking up the child, or placing the little one back in the crib. Babies, it is pointed out, squirm so quickly, and may fall if a mother allows her attention to be diverted even momentarily.

Mr. Gus Howe has returned from a trip to the Pacific coast.

Mr. and Mrs. Jerry Herman have left to take up residence in Calgary.

There is a lot of difference between what is good and sound and what merely sounds good.

Mrs. S. G. Bannan who was a patient at the local hospital, has returned to her home.

The concern of the government should be what motivates men, not just who manages them.

Born to Mr. and Mrs. Frank Petras on Sunday, July 28, at Perry's Maternity Home, twin boys.

Mrs. Tita Battel and family have returned from a vacation spent visiting relatives at the west coast.

Mr. John Goss, of Vancouver, is spending a holiday in Blairmore, the guest of Mr. and Mrs. C. Minnie.

KNOWLEDGE is knowing the facts. INSIGHT is seeing their cause. WISDOM is knowing what to do about them.

Mrs. Frank Edl and son Donnie, of Frank, left today for a month's vacation, visiting Mrs. Edl's parents, Mr. and Mrs. Lutheland, in Calgary.

Mr. John L. Lewis, head of the United Mine Workers of America, stopped at the Glenhill Grill today for lunch, on his way to Calgary.

Dr. and Mrs. R. K. Lillie and Miss Kaye returned from a holiday that took them through the State of Washington and as far as the Okanagan.

Mr. and Mrs. R. Donaldson visited Mrs. Donaldson's parents, Mr. and Mrs. Dewar in Coleman this week. Bob is representative for the Mid-West Paper Sales, Lethbridge.

Mrs. L. W. McDonald and two children, of Trail, stopped off for a brief visit with Mrs. Lily McDonald enroute to Calgary. Miss Anne McDonald, who has spent a holiday at home here, returned to Trail this week.

"Notices to Taxpayers" were posted this week to the effect that a vote will be taken on August 14th next in respect to the Town's proposal to raise \$20,000 in Debentures, for the purpose of grading and hard-surfacing five miles of the town's streets. A poll will be open from 10 a.m. to 7 p.m. on that date.

Mrs. J. B. Harmer and Mrs. A. Deoux were joint hostesses on Monday afternoon and evening at social functions in honor of their sister, Mrs. J. Murphy, of Victoria. Mrs. Murphy and daughter Mary, returned home yesterday following a week's visit with her mother, Mrs. W. Howe, and other family members and their families.

Membership in a service club is a mark of good citizenship, according to officials of the department of national health and welfare, Ottawa. One senior official said: "A service club is just a bunch of the best fellows banded together for the good of the community. Theirs is the spirit which gets things done, and as they strive for better environment, they advance, each one, to happier and healthier living."

Summer holiday time gives parents an ideal opportunity for having essential medical and dental check-ups of children, points out an announcement by the department of national health and welfare, Ottawa. At this season appointments may be made with least inconvenience to all concerned. This would, of course, be only one of the seasonal checks which the department suggests should be as frequent as the family physician feels it necessary, consistent with the age and condition of the child.
